cognitive neuropsychological research studies of people with cognitive deficits have typically
been directed either at investigating methods of intervention or at furthering our understanding
of normal and impaired cognition this book reports on research that combines these goals
using studies that use intervention as a tool for investigating hypotheses about the functioning
of the human cognitive system the introductory chapter discusses some of the unique and
more general difficulties that this approach faces while the five reports describe intervention
studies with children and adults with cognitive impairments studies which investigate current

theories of cognition the studies demonstrate that the use of intervention to study cognition is a promising and valuable methodology aiming to promote wider use of these combined methods this book makes it clear that while the approach faces various methodological and interpretative challenges it has the advantage of providing advances on issues of theory while at the same time providing treatment to participants and bringing together what have been largely separate research traditions this book was originally published as a special issue of cognitive neuropsychology

the group of experts on action against trafficking in human beings is responsible for evaluating the implementation of the council of europe convention on action against trafficking in human beings by the countries which have ratified it greta is composed of 15 independent and impartial experts from signatory countries they come from a variety of backgrounds legal professionals law enforcement officials psychologists doctors civil society representatives etc and are selected on the basis of their professional experience in the areas covered by the convention

this book puts lights on the detailed knowledge of assessment from a constructivist perspective it should be understood by teachers that it is not assessment of learning but assessment for learning assessment needs to be seen as a part of our education system rather than a separate part all the units of this book have been written keeping the centre idea of assessment and learning in every aspect of teacher and students the book presented highlights assessment for learning constructivism and assessment in the first unit levels and dimensions of learning in the learning in the second unit different types of assessment techniques in the third unit assessment tools portfolios feedback in the fourth unit and includes feedback progress record in fifth unit

the book discusses how the two interrelated questions of biopolitics and ethics influence discursive and non discursive practices in the fields of international relations and strategic studies the book debates the following research question of how discussions on global regimes that rule human empowerment and human fragility in international and strategic arenas require the establishment of a complex relation between the contested concepts of biopolitics and ethics the book focuses on six main areas which are 1 the politics of in security 2 complex emergencies and contemporary terrorism 3 health risk and population management 4 environment and climate change 5 the politics of memory and trauma and 6 migration and refugee flows the usefulness of the book derives from critically questioning how international public policies in sensitive areas like terrorism global health global migration flows or humanitarian assistance are being built through global policy regimes and global discursive regimes

today a multinational video game developer sega was the first to break nintendo s grip on the gaming industry expanding from primarily an arcade game company to become the dominant game console manufacturer in north america a major part of that success came from the hard work and innovation of its subsidiary sega of america who in a little more than a decade wrested the majority market share from nintendo and revolutionized how games were made drawing on interviews with nearly 100 sega alumni this book traces the development of the company revealing previously undocumented areas of game making history including sega s

relationship with tonka the creation of its internal studios and major breakthroughs like the sega channel and heat network more than 40 of the company s most influential games are explored in detail
